

NEW HOME PROGRAM

Community Energy Association

We're working together to help B.C. save energy.

AGENDA

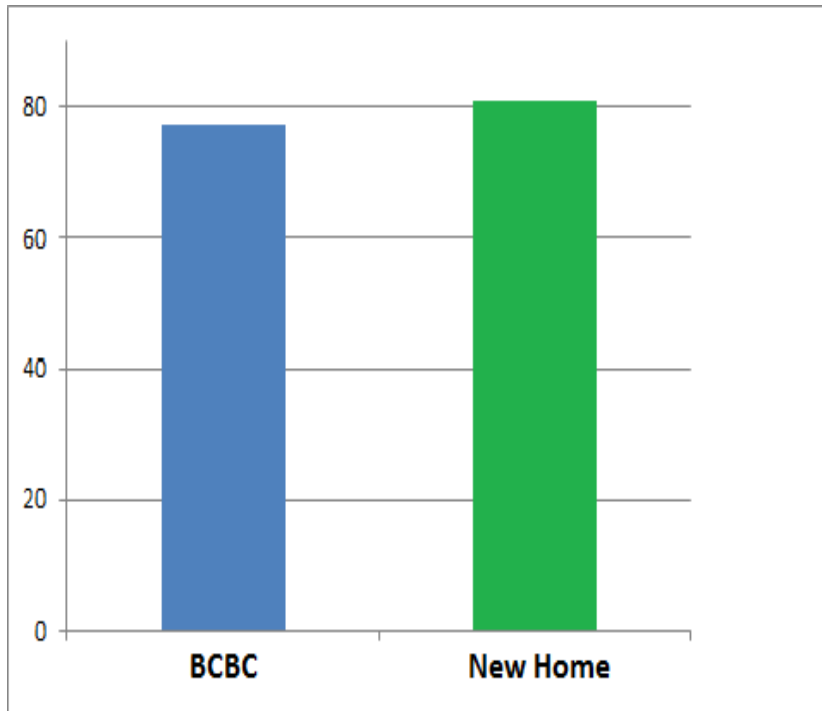

New Home Program Overview

1. Program Standard & Offer
2. Who's Involved
3. Program Requirements
4. What's in It for Consumers?
5. Builder Stories
6. Lets Work Together

We're working together to help B.C. save energy.

NEW HOME PROGRAM

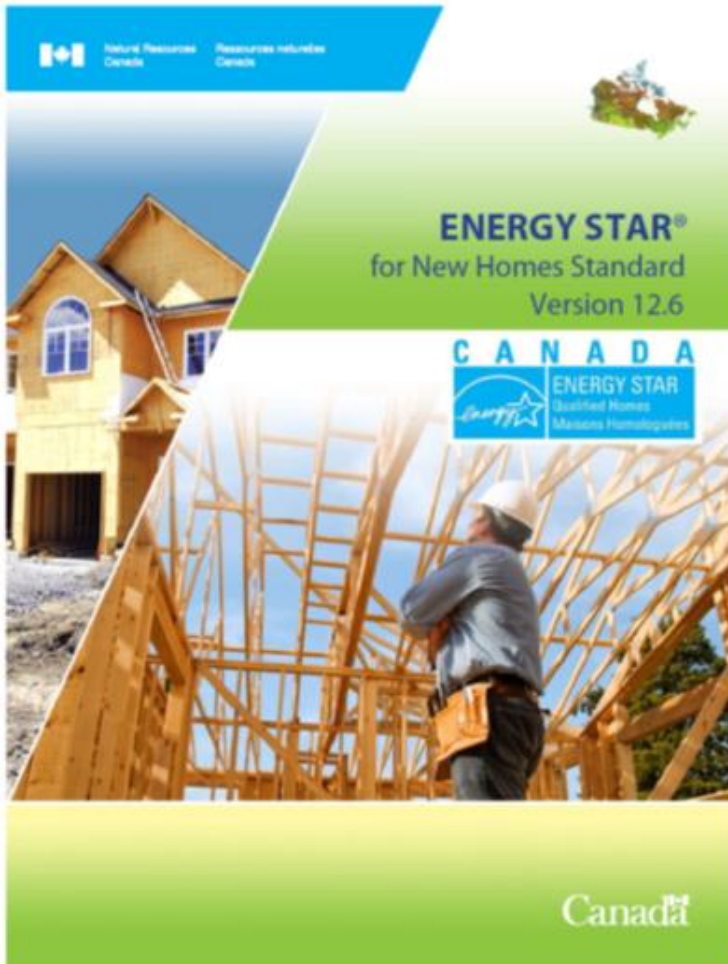

- The New Home standard (ESNH) is above BCBC.
- We strive to continue advancing BCBC.
- Work with multiple industry partners.

We're working together to help B.C. save energy.

NEW PROGRAM DIRECTION

ENERGY STAR® FOR NEW HOMES

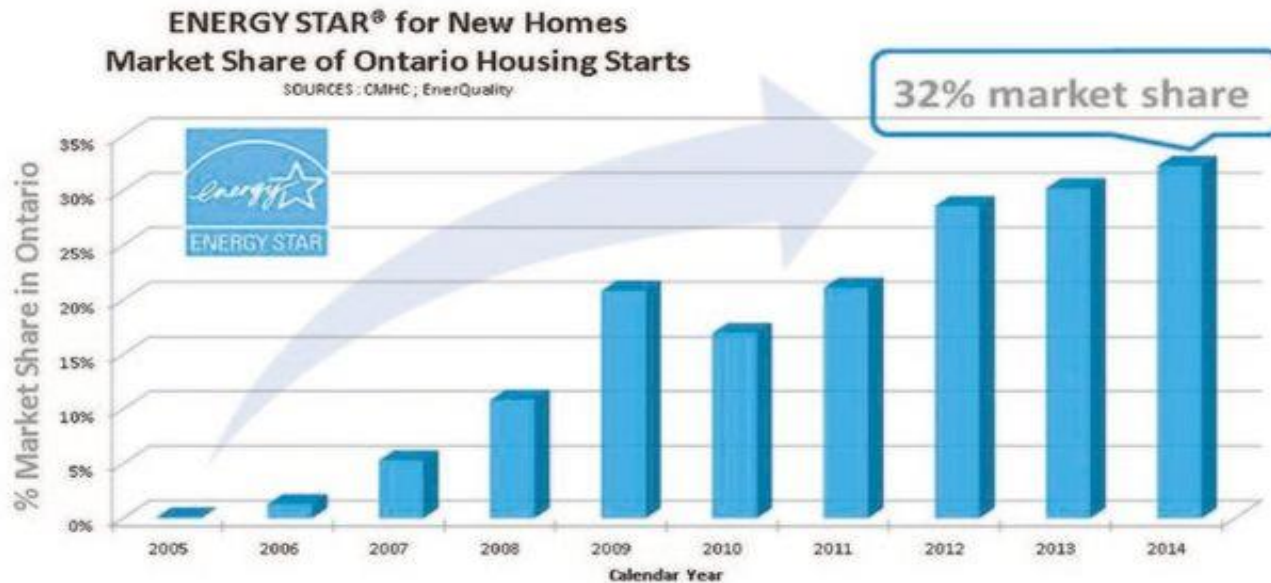

- Designed 20% better than Code.
- Utilizes common building practices.
- It's flexible...
 - prescriptive “menu” – builder options
 - performance energy model – EG81
- Consumer access to truly energy efficient new homes.

We're working together to help B.C. save energy.

NEW PROGRAM DIRECTION

ENERGY STAR® for New Homes is Canada's Most Successful Green Building Program

We're working together to help B.C. save energy.

ENERGY STAR VS. ENERGUIDE

ENERGY STAR for New Homes

Core package of energy efficient products and minimum performance levels.

- HOT2000 software
 - Develops energy model from plans
 - Air leakage test at completion
-
- ✓ Pass/fail air leakage ≤ 2.5 ACH50
 - ✓ Requires ENERGY STAR HRV
 - ✓ Requires minimum insulation levels
 - ✓ Requires ENERGY STAR windows and doors
 - ✓ Requires 400kWh electricity savings

Energuide Rating System

Records values but doesn't require minimum efficiency of products

- HOT2000 software
 - Develops energy model from plans
 - Air leakage test at completion
-
- Records air leakage value
 - Records equipment models
 - Records building component levels

We're working together to help B.C. save energy.

THE OFFER

- Builder incentives
- ENERGY STAR® for New Homes
- EA training, subsidies and support
- Collaboration and Partnerships
- Marketing support
- Realtor and consumer education

We're working together to help B.C. save energy.

OPTION 1

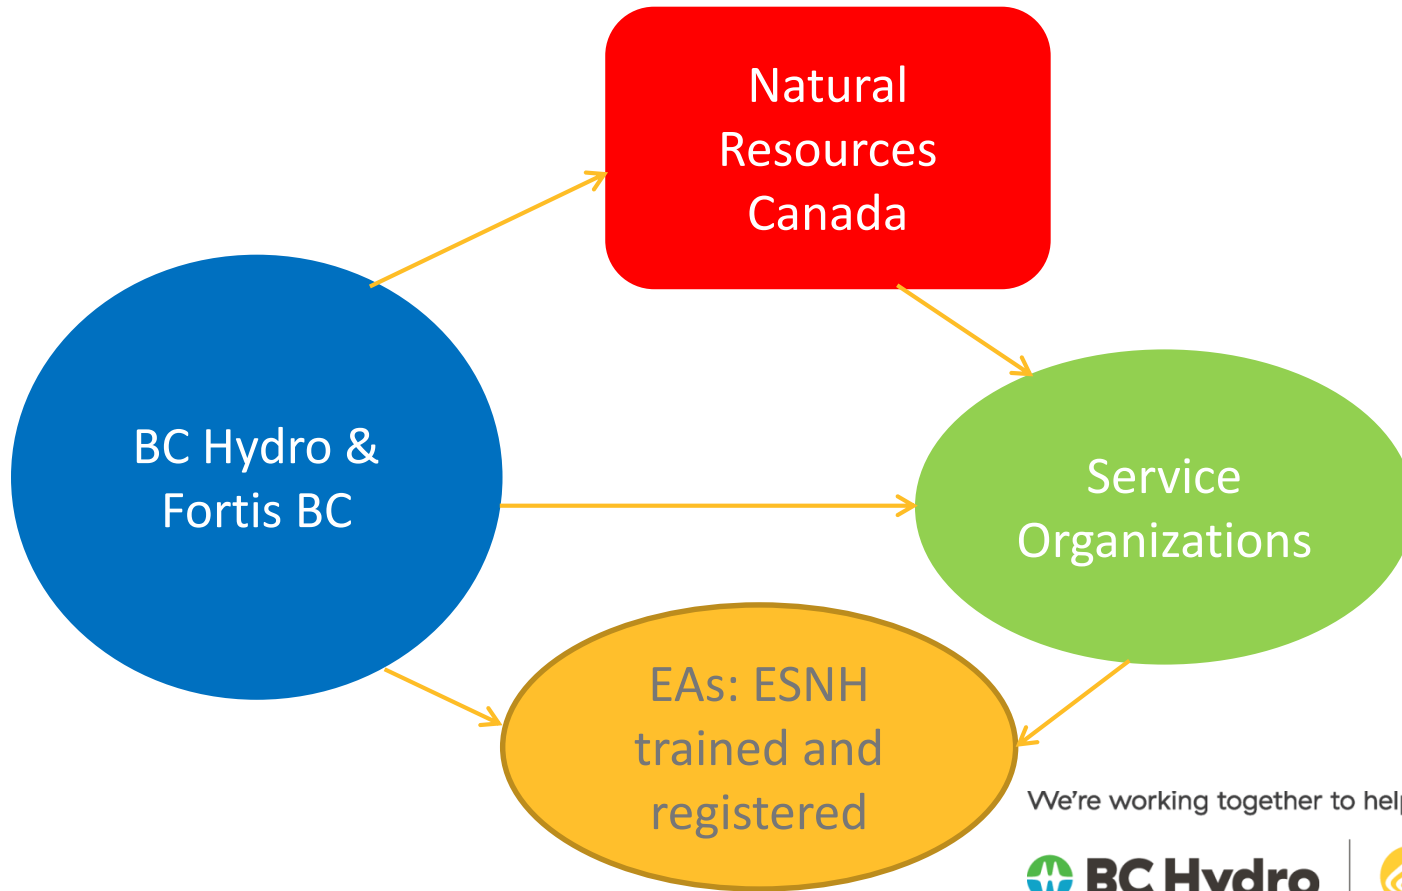

Whole Home Performance	ENERGY STAR® New Home			EG 82
	SFD	Duplex	Rowhouse/ Townhouse	Laneway
Province	\$2000	\$700	\$700	\$250
City of Vancouver	\$250	\$250	\$700	\$250
ENERGY STAR Dryer	\$100			
EnerChoice Fireplace	\$300			

Whole home incentives for ENERGY STAR® qualified homes and laneways, minimum EG82, are applicable to natural gas heated homes, provided by FortisBC, and homes in the FortisBC electric service territory.

We're working together to help B.C. save energy.

WHO'S INVOLVED?

We're working together to help B.C. save energy.

OPTION 1 – HOW TO GET STARTED

- **Contact** a CEA who is ENERGY STAR® for New Homes trained and licensed and who has completed New Home training sessions.
- **Train** and familiarize themselves with New Home Program including ESNH during pre-construction consultation.
- **Contact** CHBA to register for the Building Sciences for New Home course.
- **Get Certified** with the Builder Certification Webinar 3 hour/\$70.00 webinar.
- **Register** with NRCan as an ESNH builder.
- **Support** is available from EAs.

We're working together to help B.C. save energy.

OPTION 1 – REQUIREMENTS BY PHASE

- 1. To start:** EAs complete two training sessions, sign utility agreement.
- 2. Pre-construction:** review program during orientation with builder participants and complete “Pre-construction recommendations”.
- 3. Mid-construction consultation:** air leakage assessment, “Mid-construction consultation” with recommendations. Follow up/check-in.
- 4. Post-construction:** “ESNH verification checklist” with utility tabs, re-name file for New Home application.

We're working together to help B.C. save energy.

OPTION 2

Natural Gas Appliances Only

Water Heaters	Up to \$1,000
ENERGY STAR Dryer	\$100
EnerChoice Fireplace	\$300

- Application form available at www.fortisbc.com/newhome
- Contact FortisBC Energy Solutions Manager – natural gas
- Contact FortisBC Energy Advisor – electric

We're working together to help B.C. save energy.

FOR HOMEOWNERS

ENERGY STAR® qualified homes offer “built-in comfort, quality and peace of mind.”

- **Comfort:** minimizes warm and cold spots.
- **Durable:** focus on envelope first, minimum requirements beyond building code.
- **Healthier:** a balanced fresh air system (HRV) improves indoor air quality with a filter to reduce dust, pollen and other allergens.
- **Peace of mind:** third party verified by trained energy advisor and ENERGY STAR labelled.

We're working together to help B.C. save energy.

BUILDERS' EXPERIENCES

Symphony Homes: Elenora Residences

- Single Family Homes (12)
- While meeting local municipal requirements, came upon ENERGY STAR for New Homes & Built Green.
- Maintain quality at affordable price.
- Sets them apart.
- Discloses and shows potential buyers.
- Estimate costs to be 3 to 4% more.

We're working together to help B.C. save energy.

LET'S WORK TOGETHER!

- Brochure orders
- Email: newhome@consumer-response.com
- We welcome opportunities to sponsor builder breakfasts or builder association events in your area.
- Other ideas – let us know

We're working together to help B.C. save energy.
